

The Dynamics of Drugs & Opioid Trends

Monday, December 4, 2017
8:00 a.m. to 3:30 p.m.

Fairfield Inn, Moscow, Idaho

1000 W Pullman Road | (208) 882-4600

PRESENTATION TOPIC

This training will cover a wide array of various prescription drugs, drug trends, overdoses, and impairment. Also included will be new drug references, marijuana concentrates, new drug clothing, drug concealment methods, drug paraphernalia, logos, youth party tendencies, trending synthetic drugs, inhalants, marijuana legalization trends, new E-cigarettes, and popular party drugs.

Americans reported using a prescription drug for non-medical reasons in the past year. Thousands of overdoses and deaths have occurred with narcotic analgesics and sedative drugs, in 2016 alone. With the numbers increasing daily, it is imperative to learn the recent trends in prescription drug abuse. This will include investigation techniques, identifying impairment, and identifying the various different types of products. All attendees will come away with the skills that allow for the detection of people under the influence of the 7 major drug categories.

This training will open your eyes to the widespread usage of designer drugs, opioids, herbal drugs, and drug impairment in our communities along with the associated items involved with the drug culture.
