Spread the word to your colleagues about this exceptional learning opportunity!

New Resource Article:

Medical Marijuana Laws and Pregnancy: Implications for Public Health Safety

Although there is much to learn yet about the effects of prenatal marijuana use on pregnancy and child outcome, there is enough evidence to suggest that marijuana, contrary to popular perception, is not a harmless drug, especially when used during pregnancy.
Consequently, the public health system has a responsibility to educate physicians and the public about the impact of marijuana on pregnancy and to discourage the use of medical marijuana by pregnant women or women considering pregnancy.
