

The Maternal and Child Health Program of the Idaho Department of Health and Welfare and Comagine Health have partnered to establish Idaho's Perinatal Quality Collaborative (PQC)! The PQC brings together clinical providers, public health leaders, payers, and community-based organizations to improve outcomes for pregnant people and babies. We are currently engaged in stakeholder meetings as we formalize the structure of the PQC and select an Alliance for Maternal Health Innovation (AIM) Patient Safety Bundle. Stay tuned for invitations to virtual regional stakeholder meetings where we can hear from you!

Jennifer Liposchak is the Women and Infant Health Program Manager for the Idaho Department of Health and Welfare's Maternal and Child Health Program, where she has been instrumental in improving maternal and infant health outcomes in Idaho. She coordinated the Idaho's Maternal Mortality Review Committee and is dedicated to supporting moms and babies throughout the state. Her passion for public health began as a peer-to-peer educator with Vandal Health Education, and she has since gained invaluable experience in a variety of public health programs, with a focus on adolescent pregnancy prevention and reproductive health.

Ami Hanna is the maternal program manager at Comagine Health and has extensive experience in improving maternal health outcomes for underserved communities, Ami is a dedicated maternal health advocate with a deep understanding of the complex social determinants that impact maternal health. As a full-spectrum doula, Ami Hanna has provided direct service to a diverse range of pregnant and parenting families, including low-income families, and families of all shapes and sizes. Her work has provided a firsthand understanding of the barriers that many families face in accessing quality maternal health care.

Genevieve Rasmussen is an experienced Project Manager with eight years of experience in direct patient healthcare settings. She has led large-scale data collection and evaluation projects, including the Mental Health Statistics Improvement Program Survey for the State of Oregon, and currently manages the Oregon Maternal Data Center amongst other projects.

Phillip Wetmore is a Senior Project Coordinator dedicated to improving maternal health care quality by collaborating with health care providers, community partners, and beneficiaries. He has helped implement the OB Hemorrhage AIM patient safety bundle and coordinated with the Oregon Perinatal Collaborative to host the annual maternal health summit amongst other projects.
